**The Winery:** Darien wines provide a seamless blend of tradition and modernity. The vineyards are located just outside of Logroño in the heart of some of the best vineyard land found in Rioja. Darien's new state-of-the-art winery is situated on a terrace overlooking the Ebro River, the vineyards are composed of clay and sandy soils. Darien owns a substantial amount of vineyard land, both at the site outside Logroño and at their estate Las Rades. The control that this affords vineyard manager Juan Luis Gonzalez and winemaker Tomás Iturriaga is evident in the wines. Stylistically, the wines reflect a modern approach while maintaining their traditional roots. Production is small and quality oriented.

**Vinification:** The different grape varieties which make up this wine were fermented separately and the coupage of the wine took place before transfer to barrels. In the vinification process, first the grapes were destemmed and then fermented for six days, at a maximum temperature of 28°C. The maceration process was extended for 15 days and after racking off, malolactic fermentation began. The wine was aged for twelve months in French and American oak casks. To safeguard the rich aromatic complexity of the wine, it has been allowed to stabilize naturally.
